HARDY PERENNIALS

Hardy Vines, Shrubs, Roses
Evergreens, Fruit and Shade Trees, Etc.

WILHELM MILLER says in the Garden Magazine: “But now that the treasures of the Far East are lavished upon us, we have hardy plants suitable for practically every purpose the most exacting gardener can conceive. And wherever we have any special object to accomplish, we ought to try nine times to find a hardy plant that will do the work before falling back on a tender one. And this for two reasons: First, hardy plants harmonize better with our climate and environment than tropical plants. Second, as a rule, they are cheaper to maintain. And, in the long run, those effects which grow naturally out of the soil, and out of true economy, will be recognized as the most artistic.”

The PALISADES NURSERIES
INCORPORATED

R. W. CLUCAS, Manager

SPARKILL, N. Y.
The Palisades Nurseries

SOME seven years ago the inaugurator of the Palisades Nurseries recognizing the absence of a Nursery in the vicinity of New York City where a full representative stock of Hardy Perennials could be found in commercial quantities, established these Nurseries for this purpose.

We believe we have now as complete a stock of this class of plant growing in commercial quantities as can be found anywhere and as we have made them our specialty we are in a position to give the best of satisfaction in the filling of all orders intrusted to our care, and particularly solicit the trade of Seedsmen and Nurserymen who catalogue Perennials, but who have their orders filled and shipped outside their own establishment to go direct to their customers. We would guarantee to guard and protect their interests.

A Few Practical Hints

ON THE CULTURE OF HARDY PERENNIALS AND HERBACEOUS PLANTS

From Bar's Retail Catalogue

In preparing the Herbaceous Plant Border, dig deeply and freely add well-decayed stable manure; after digging or trenching, the ground should be allowed a few days to settle before planting.

Plant only when the soil is in a friable condition; it is better to lay plants in if the ground is not in good working order and wait rather than plant in wet, clammy soil.

After planting the soil should be gently pressed round the collar or neck of the plants. This is most important, especially on freshly dug ground, where plants will often require recollaring two or three weeks after planting, while some which may have been drawn below their proper depth with the settling of the soil will require raising to their proper level. Use the hoe freely on fresh plantations, keeping the surface soil well broken. The crust or surface soil of all plant borders should be carefully and thoroughly broken in spring and kept broken throughout the summer, if this is persevered in, much labor will be saved in watering, as the evaporation of moisture from the soil will thus be greatly reduced; the soil is also in this way kept fertile, and fewer plants are lost during a long spell of dry weather. The free use of the hoe also effectively eradicates from the soil such pests as ground slugs, wire worm, millipedes, etc. The best tool to use in choice borders and rock gardens is a small swan-necked onion hoe, and for larger plant borders a swan-necked draw hoe.

Rhizomatous plants (such as Irises, etc.) should, as a general rule, be planted with the rhizome near the surface.

Rapid-growing Hardy Perennial Plants, such as many of the Helianthus (Sunflowers), Asters (Michaelmas Daisies), etc., should be transplanted every two years, replanting not more than two or three of the strongest single crowns to form a clump.

Remarks on the Question of Sun or Shade for Plants

The whole question of sun or shade for plants is mainly dependent upon the amount of moisture a plant's roots can obtain from the soil. On rich and heavy land, or deeply dug and well-manured soils, where sufficient root moisture exists, most plants will take all the sun they can get; whereas, on shallow, thin, or badly dug soils, shade or partial shade is necessary to the successful growth of many plants, owing to the rapid evaporation from the soil and the plant's leaves, and the consequent starvation or overtaxing of the roots. On poor, sandy, or shallow soils a heavy mulching of rotted manure, applied early in spring or autumn, will prove a valuable assistance to the growth of all hardy herbaceous plants, also a surface dressing in autumn of sulphate of potash, at the rate of 2 cwt. to the acre, or 1 oz. per square yard, should be applied annually to help retain all moisture possible in the soil.

So much do plants depend upon root-moisture that often a few small stones placed over the roots, to retard evaporation, will ensure their success, where otherwise they would be a failure. Marsh plants, aquatic plants, and Alpine plants especially like full sunshine when they are able to obtain abundance of water at the roots; otherwise, they are best grown in partial shade.

On hot, dry, sandy soils, deep digging (in autumn if possible) is necessary at least every two or three years, with a liberal addition of well-rotted manure. An annual surface dressing should annually be given of sulphate of potash at the rate of 2 cwt. to the acre and surface mulching of manure in February will prove of valuable assistance to the plants.

Many plants like peat because it acts like a sponge in the soil in holding moisture (which is one of the primary objects in dressing land with stable manure), and moreover it is warmer than loam. Plants, again, which object to loam will naturally thrive in peat.

In gardens where there is little natural shade, this can generally be obtained by the use of tall-growing herbaceous plants or annuals, such as Sunflowers, clumps of Sweet Peas, Helianthus, Michaelmas Daisies, etc.

Best Time for Planting

On very dry, sandy, and hot soils, autumn planting, where possible, is advocated; while on cold, wet and heavy soils, spring or very early autumn planting will generally be found to be preferable. The best months in autumn for planting hardy plants are September and October, while the summer's warmth is still in the ground; the best spring planting months are April and May. Most tap-rooted plants are best planted in autumn. In cold districts, all autumn plantings should be protected with some slight covering, such as cut pine branches or very light litter, which let in the air, but protect during severe weather; cut fern or leaves are bad, as they lie too wet.
NOVELTIES AND SPECIALTIES

Whilst many of the articles described under this caption are new and novel among the latest introductions in the Hardy Perennial family, we do not intend to convey the idea that they are all novelties not before offered, as we understand the term might imply; but as there are so many valuable Hardy Plants of sterling merit unknown to the general trade, we have given prominence to and specialized among this list that we find are not easily procured in quantity for the reason that they have fallen into obscurity, in this country at least, by disuse, and are known only to the few.

The old saying that "Nothing is new under the sun" can perhaps be better applied in connection with those old-fashioned flowers or the favorites of old-time gardens than any other class of plants. Their having come into public favor in recent years has created an astonishing demand for not only improved forms, but many of the older or forgotten varieties which, by long absence, are strangers and look subjects for a new christening.

As to their special use, great beauty and adaptability, we may make no comment here, for lack of space, but refer to the retail catalogues of nurserymen who offer them for sale, the horticultural department of all household magazines and the horticultural papers of today, all of which appear to give them more prominence than any other class of plants.

This popularity is not surprising when we consider the case with which they are grown and the amount of neglect they will withstand.

Making, as we do, a specialty of growing Hardy Perennials, gives us an opportunity of judging the different foreign and native Hardy Plants, among which we frequently find a neglected one fallen toward the rear, but deserving of a front seat.

This, we trust, will make the reason for placing several varieties under this heading, and we hope to attract the attention of the trade and their customers toward them, as many should be better known and would be found money-makers for the retail catalogue trade as a leader, especially at the present time, when this class of plant is attracting so much of the gardening-world attention.

**Amaryllis Hallii, or Lycoris Squamigera**

Hallii, or Lycoris squamigera. A perfectly hardy Amaryllis, producing beautiful pink flowers. One of the very good things never widely introduced and almost lost to floriculture. In early spring it produces attractive green foliage, which grows until July, when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as it by magic, the flower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to twelve in number, of a delicate lilac-pink, shaded with clear blue. As the bulb is perfectly hardy, without any protection, it can be planted in the fall—the best time—as the bulbs will have a splendid chance to get established before flowering time. Cover the crown about 4 inches. Very useful for the hardy border or among shrubbery. 50 cts. each, $1.50 per doz., $2.50 per 100.

**Achillea**

**Millefolia, Cerise Queen.** We might call this an improved form of the Purpurea, with a bright cherry-red color, well adapted for massing; grows twice the height of the Purpurea. 10 cts. each, 75 cts. per doz., $6.50 per 100.

**Boule de Neige.** An improvement on "The Pearl," with flowers one-half larger; a valuable cut-flower. 25 cts. each, $1.50 per 100.

**Aconitum**

**Wilsonii.** Novelty, recently introduced from China. The graceful flower-spires attain a height of 6 feet, and produce many fine pale blue or violet flowers. It blooms from the beginning of September until the end of October. 15 cts. each, $1.50 per doz.

**Actaea**

**Japonica (Cimicifuga simplex).** This pretty variety produces in late fall a large quantity of erect stems, with spikes of feathery white flowers. It blooms when there are but few other outdoor flowers. Very desirable plant. 15 cts. each, $1.50 per doz., $1.25 per 100.

**Anchusa**

**Italica, Dropmore Variety.** Sterling novelty. The splendid flowers are of the purest blue imaginable and produced on branched stems, growing about 4 feet high. It is, doubtless, the finest blue herbaceous plant in cultivation. Strong plants from the field, 15 cts. each, $1.25 per doz., $8.50 per 100; 3-inch pot-plants, 10 cts. each, $1 per doz., $7.50 per 100.

**Anemone**

**Japonica, Prinz Heinrich.** New dwarf, compact habit; large, semi-double, dark red flowers; the darkest double Japanese Anemone. 10 cts. each, $1 per doz., $7.50 per 100.

**Pulsatilla alba** (White Swan). The beautiful white variety of the common Pulsatilla. 25 cts. each, $2.50 per doz.

**Armeria**

**Formosa hybrida.** New and very effective rock-plant. Stronger-growing than Maritima. Various colors. 25 cts. each, $2.50 per doz.

**Anthericum**

**Liliastrum giganteum.** This new and scarce variety produces stems of about 3 feet high, with pure white flowers of double the size of the ordinary Anthericum. 25 cts. each, $1.50 per doz.

**Aster (Michaelmas Daisy)**

**Beauty of Colwall.** Of all the varieties of Asters that have been raised for many years past, there are none that can approach in beauty the above novelty. The flowers are perfectly double, of a very pleasing shade of lavender, produced in great freedom on stout, erect stems, about 4 feet high. It is of robust constitution, a good grower, and requires no staking or tying to keep in position. It has been unanimously awarded a First-Class Certificate by the Royal Horticultural Society, and is unquestionably a most valuable acquisition to this family. Strong plants, 25 cts. each, $2.50 per doz.

**Amelius, Perry's Favorite.** New variety with red flowers; the most beautiful color of this section. 15 cts. each, $1.50 per doz.
Wholesale Price-List of The Palisades Nurseries, Sparkill, N. Y.

**Asteris.**

Mesa grande speciosa grandiflora. One of the finest Asters in cultivation, being quite distinct, with large, dark blue flowers in great abundance during July and August. It grows about 1 1/2 feet high. 15 cts. each, $1.50 per doz.

**Novelty.** This variety grows about 2 feet high, and bears bright pink-colored flowers of medium size in great profusion. Its semi-dwarf, compact-growing habit forms a perfect mound which is literally covered with rosy pink flowers; one of the best. 10 cts. each, $1.25 per doz.

**Auricula (Primrose)**

A European perennial, sending out short scapes, bearing flowers of many colors. It is one of the most famous of florists' flowers, but has never received the attention in this country that it has in Europe. In this country it is generally treated as a greenhouse plant, but is hardy, and in the Old World is grown largely in frames. 15 cts. each, $1.25 per doz.

**Achillea.**

Hayloogensis. Long-squatted type. This is such an improvement over the ordinary Chamaebati that they must be seen to be appreciated. They contain light and dark blue, pink, white, and red shades, long-squatted unusually large flowers, and bloom profusely with a brilliance of color that is difficult to produce with any other flower. Strong, 2-year-old field roots, 12 cts. each, $1.50 per doz. 3-inch pot-plants, 10 cts. each, 75 cts. per doz., $1.50 per 100.

Helena. Sky-blue, with white corolla, very long spurs; one of the prettiest, most vigorous growing and free flowering of the Chamaebatias. The flowers are of an exceptionally large size and beautiful form; a perfect gem. 10 cts. each, $1. per doz., $7.50 per 100.

Cerulea. True species from the Rocky mountains, bearing lovely blue and white flowers, with elegant long spurs; height 12 inches. We offer seedlings from carefully saved seed, which ought to come true. 10 cts. each, 75 cts. per doz., $1.50 per 100.

**Arenaria.**

Caspitosa. Forms a bright green carpet, studded with tiny white flowers; height 3 inches. 10 cts. each, 85 cts. per doz., $6.50 per 100.

**Alyssum.**

Saxatile fL., pl. (Double Perennial Alyssum). A beautiful new double-flower form of the "Gold Dust" variety, producing masses of brilliant golden yellow flowers; height 6 inches; 15 cts. each, $1.25 per doz., $7.50 per 100.

**Anthemis.**

Grandiflora. This is a great improvement over the original type; the flowers are very large, resembling a yellow Marguerite in size, form and color. 15 cts. each, $1.50 per doz., $10 per 100.

**Boltonia.**

Lateissima nana. A dwarf form of Lateissima, having all the characteristics of that variety, except that it does not grow higher than 1 1/4 to 1 1/2 inches and is covered with pretty pink flowers. A new and desirable sort. Makes a fine specimen plant, as it branches freely from the bottom of the stalks, forming a complete bush. 10 cts. each, 75 cts. per doz., $5.50 per 100.

**Campanula.**

Pyramidalis. It is singular that so handsome a variety as this should not be more commonly known and grown in all gardens. It requires no special treatment and yet throws flower-spikes 4 to 6 feet high, with numerous bell-shaped flowers, and continues to bloom the entire summer. In the vicinity of Lenox it is grown in tubs and large pots for terrarium decoration. We offer plants of both the blue and white. Strong, field plants, 12 cts. each, $1. per doz., $7.50 per 100.

**Persicifolia.**

This splendid new Campanula is one of the best Hardy Perennials introduced in many years. It is a plant that, in a remarkably short time, has been disseminated all over the world, owing to its most beautiful, large, double, white flowers. 15 cts. each, $1.25 per doz.

**Persicifolia alba grandiflora.** Flowers white, fully twice the size of the old single white, and of finer texture. One of our finest hardy border plants and valuable for forcing and cutting purposes. 12 cts. each, $1. per doz., $7.50 per 100.

**Latfolia macrantha.** Very handsome, enormous, drooping bells, of a fine satiny blue and deep purple shades; height, 3 feet. The flowers of this variety somewhat resemble Campanula Medium, but, being a true perennial, it is more desirable than the latter sort, which is a biennial and disappears after the first flowering season. 10 cts. each, 85 cts. per doz., $6.50 per 100.

**Chrysanthemums.**

**New Hardy Double and Single Pompon Varieties.** See General List of Perennials, pages 11.

**Maximum, Mrs. J. Tersteeg.** This new variety is the tallest-growing in commerce, producing flower-stems 3 to 4 feet high. The flowers are graceful in shape and of enormous size. It produces an immense quantity of flower-spikes, which makes it very useful for cutting purposes. 25 cts. each, $2.50 per doz.

**Nipponicum.** A hardy Japanese species. A variety worthy of special notice and not well known. Large Marguerite-like flowers, distinct, shrubbery, with dark, spiny foliage; flowers during summer and autumn, but in milder climates during the whole year. 10 cts. each, $1. per doz., $7.50 per 100.

**Clematis.**

Recta. This variety forms an erect bush or shrub 3 feet high, covered with small, pure white flowers during June and July. Nursery-grown plants, 15 cts. each, $1.25 per doz.

Campanula persicifolia grandiflora
Coriaria

Japonica. New sub-shrub, 3 to 4 feet high, with long branches, fine, fresh green foliage and berrics of a beautiful reddish brown color, turning black when ripe. Very distinct. 25 cts. each, $2.50 per doz.

Delphinium

Albion. This new variety attains a height of 4 to 5 feet, is a fine grower, and produces a well-formed spike; when fully expanded, the semi-double flowers are nearly pure white, with white eye, perfect in form and of great beauty. 50 cts. each.

Sulphureum. (Zami.) A very handsome species from Afghanistan, with beautiful, clear light yellow flowers; delights in half-shady situations. Height, 3 to 4 feet. 15 cts. each, $1.25 per doz., $8.50 per 100.

Belladonna. One of the finest Delphiniums in cultivation. It produces spikes only 3 feet high, on which the lovely sky-blue flowers are borne abundantly. Blooms during the whole summer. 15 cts. each, $1.25 per doz., $8.50 per 100.

Lize. New prize variety; large-flowering; sky-blue, white center. 3-inch pot-plants, 15 cts. each, $1.50 per doz., $9.00 per 100.

Queen Wilhelmina. Sky-blue, veined lilac; very large flower. 3-inch pot-plants, 15 cts. each, $1.50 per doz., $9.00 per 100.

Sinense Cineraria aeruleum. Splendid novelty. The erect flower-spikes are covered with a number of dark azure-blue flowers, somewhat like cinerarias, being large and flat and without spurs. 15 cts. each, $1.50 per doz.

Dianthus

Plumarius, Comtesse Knuth. New Hardy Yellow Carnation. Originated in Denmark, and the introducers claim it to be perfectly hardy even in the most severe winters, and that it is the forerunner of a new type. It has been described by the Horticultural press in glowing terms on account of its excellent qualities as a flower, especially adapted for growing in quantity outside for market purposes. The flowers are bright yellow, and are produced in clusters on stiff stems, 24 to 48 inches long, from July until November. We believe this to be one of the best novelties of recent introduction. Plants from small pots, 50 cts. each.

Hybrida, Napoleon III. (Mule Pink.) Most authorities claim this to be the best Hardy Garden Pink, and whilst not new, it is not sufficiently well known, or it would be grown everywhere, as it adapts itself to all locations. It is perfectly hardy and gives a continuous crop of bloom the entire season, the double flowers are clove-scented and their color is a deep blood-crimson. 15 cts. each, $1.25 per doz.

Hybrida, Furst Bismarck. (Mule Pink.) This fine plant deserves to be widely known. It was sent out some years ago in Germany, but not being properly introduced it never came to the front. We have tried it and found it comes close to Napoleon III, the color being an equally bright shade of red. Its chief advantage appears to us to be its stronger constitution; while Napoleon III dies off very often, this variety stands admirably well. 15 cts. each, $1.25 per doz.

Barbatus, Newport Pink. A distinct new color which originated in one of the far-famed gardens at Newport, R. I. In color it is what florists call watermelon-pink or salmon rose. Strikingly brilliant and beautiful; the flowers are borne in massive heads on stems 18 inches high. For mid-season mass bedding it has no equal. It is also very effective for cutting. 15 cts. each, $1.50 per doz., $9.00 per 100.

Latifolius atrocinus. fl. pl. (Everblooming Hybrid Sweet William.) A beautiful summer bedding variety, producing masses of brilliant fiery crimson flowers throughout the entire season. 10 cts. each, 75 cts. per doz., $5.50 per 100.

Dictamus

Caucasicus. This new large-flowering variety is a great improvement on the common Fraxinella. Its flower-spikes are about double the length, and are raised high above the foliage. 15 cts. each, $1.50 per doz.

Eupatorium

Coelestinum. The flowers of this native plant are a decided blue and resemble closely the ageratum. We especially recommend Coelestinum as being a most desirable late-flowering perennial. Height, 18 to 24 inches. 10 cts. ea., 75c. per doz., $5.50 per 100.

Gypsophila

Paniculata fl. pl. This beautiful plant is considered the best novelty raised in the last few years; grows about 3 feet high and its pure white flowers are perfectly double. Valuable for cutting and a most desirable addition to the hardy border. 25 cts. each, $2.50 per doz.

Repsa monstrosa. With larger flowers than the other Gypsophila. It flowers also a month earlier, has a very elegant habit and is therefore very useful for cutting. 12 cts. each, $1 per doz., $7.50 per 100.

Helenium

Pumilum magnificum. A fine cross between H. Pumilum and H. autumnale superbum. It grows 2 1/2 feet high and produces a great number of large yellow flowers from June till autumn. Reward of Merit, R. H. S. 12 cts. each, $1 per doz., $7.50 per 100.

Incarvillea

Grandiflora. New. This is a rare and highly desirable plant of recent introduction. It differs from the now well-known Delavayi by its much larger flowers and its more compact growth, moreover, the color is much deeper crimson-red; while the flowering season is also two to four weeks earlier than the Delavayi, and lasts three weeks longer. The propagation is by no means as quick as the Delavayi, the seeds taking longer to germinate. 12 cts. each, $1.25 per doz.

Iris

Sibirica, Snow Queen. An exquisite new Hardy Iris; flowers of snowy whiteness, large and well formed, produced in great abundance; foliage light and graceful. Height 3 feet. A grand Iris for flower-border or waterfront. 15 cts. each, $1.25 per doz.

Pallida Dalmatica. A fine and most distinct form, of erect habit, recently introduced. Its glaucous leaves are of strong growth. Large flowers of lavender-blue. 15 cts. each, $1.50 per doz.
Iberis

Sempervirens, Snow Queen. A quite distinct and improved sort, the foliage being a darker green and the flowers much larger than the type. Strong plants, from pots, 10 cts. each, $1 per doz., $7.50 per 100.

Hemerocallis (Yellow Day Lilies)

We have several varieties of recent introduction, all of which are so great an improvement over the older varieties of the Yellow Day Lily, such as Fulva, Placa and Dumbortier, that the contrast in size is as marked as that between our native Lilies and those of Japanese origin. For varieties, see page 13.

Lupinus

Polyphyllus Mörheimi. This is one of the finest novelties, flowering throughout the summer. The fine long spikes of pink and white-colored flowers make it a grand acquisition for cutting purposes, as well as for the border. 25 cts. each, $2.50 per doz., $20 per 100.

Lathyrus

Latiolius, White Pearl. True; no seedlings. The most beautiful of all Everlasting Peas, with pure white flowers, which are about double the size of the ordinary Lathyrus latifolius album. 25 cts. each, $2.50 per doz.

Leontopodium

Sibiricum, Siberian Edelweiss. Well known to tourists who have traveled in Switzerland. The increasing demand to be grown in the garden is very noticeable. Distinguishes itself by its simple culture, its large white blooms which are twice the size of the Alpine variety, also its capability of production in the low country, in comparison with the Edelweiss of the Alps, which it closely resembles. Strong pot plants 25 cts. each, $2.50 per doz.

Lychnis

Chalcedonica ft. pl. Double-flowering form of the type, having flower-heads of vermilion-scarlet on erect stems 3 feet high. One of the choicest hardy plants of recent introduction, 25 cts. each, $2.50 per doz.

Semperflorens plena. The true double Ragged Robin. If we were asked to name the hardy perennial that could be put to most use, we do not know another that has more to recommend it than this one. It flowers continuously from spring until late fall. The flowers, which are very attractive, are of a bright pink color and are borne in great numbers on stalks 12 to 18 inches long. As a border plant it has no equal, but makes the best showing when grown in mass. The delicate color and construction of the sprays of bloom make it one of the best for table decoration. It does admirably well as a pot-plant and will stand gentle forcing. It is perfectly hardy and succeeds anywhere with the least attention and the smallest plant will flower. 12 cts. each, $1 per doz., $7.50 per 100.

Monarda

Didyma violacea superba. Distinct novelty, in habit equally decorative, but the color of flowers differ from others of the type, being a rich violet-purple. 15 cts. each, $1.50 per doz., $10 per 100.

Meconopsis

Cambirica ft. pl. The double orange-yellow Welsh Poppy. A very handsome and rare plant, with orange-yellow flowers, which are perfectly double. It flowers continuously throughout the summer. 25 cts. each, $2.50 per doz.

Onopordon

Robert Bruce. A cross between the Scotch Thistle (Onopordon acanthium) and Onopordon Arabicum, resulting in a large, handsome, ornamental plant of branching habit, with bold, grayish foliage, elegantly cut, and silvery prickly flower-stems. 25 cts. each, $2.50 per doz.

Phlox

For General List, see page 17

Decussata, General Van Heutz. This produces immense trusses of enormous flowers, which are brilliantly salmon-red color, with white center. 10 cts. each, $1 per doz., $7.50 per 100.

Decussata, George A. Strohlein. Flowers of great size borne in enormous clusters, of a fine orange-scarlet shade, with deep colored eye. Height, 3 feet. 15 cts. each, $1.25 per doz., $10 per 100.

Decussata, Hanny Pfieiderer. Cream-colored, changing to salmon in the center, with carmine-red. 25 cts. each, $2.50 per doz.

Decussata, Mad. Paul Dutrie. Soft pink color, resembling the shade of a Catleya suffused with white. 15 cts. each, $1.25 per doz., $10 per 100.

Decussata, Selma. A new variety. It has a strong habit, and produces large trusses of very large pink flowers, with cherry-red eye. 15 cts. each, $1.50 per doz., $10 per 100.

Decussata, Doctor Charcot. Very attractive, large-flowering variety; color dark violet, with white center. 15 cts. each, $1.50 per doz., $10 per 100.

Decussata, Daybreak. Besides having unusually large heads of flowers, the color of this variety is most pleasing, being a delicate rose shade, like Enchantress Carnation, and is admired by all who see it. 15 cts. each, $1.50 per doz., $10 per 100.

Divaricata Lapham (Perry’s variety). Most beautiful and distinct variety of the Divaricata or Canadensis class recently introduced. The flowers are much larger and brighter in color than those of Phlox divaricata. It is of a strong-growing habit and flowers most abundantly from the middle of April till the end of July. 15 cts. each, $1.50 per doz., $10 per 100.

Polygonum

Baldschuanicum. One of the most lovely new hardy climbers for poles, arbors, trellises, etc. Throughout summer and autumn, it is smothered with innumerable lovely feathery white flowers, borne in graceful sprays, and invaluable for cutting. 50 cts. each, $5 per doz.

The writer has received plants and bulbs ordered from you with great satisfaction, the quality of the goods sent, and the splendid condition in which they arrived. All these plants were certainly hardy. — C. H. Benton, Kansas City, Mo., April 22, 1909.
Primula

Cortusoides Sieboldi (Japanese Primrose). A charming class of Primulas, bearing large, bold heads of graceful flowers, in color ranging from pure white, delicate blush-pink, and soft rose to the most intense crimson, delicate mauves and lavender-blue shades. They are quite hardy, thriving in any shady sheltered border; for shady parts of the rock-garden they are gems. They delight in a light soil and well-decayed manure. Plant in autumn or early spring. As pot-plants in a cool conservatory, they have few rivals in the spring and winter months. They always attract great attention in the European flower shows. Twelve named sorts. Separate colors, or in mixtures, 15 cts. each, $1.50 per doz., $10 per 100.

Auricula Alpine. See Auricula.

Rehmannia

Angulata. A half-hardy herbaceous perennial, recently introduced from central China. The flowers, which are freely produced on the upper third of the branches, resemble individual those of Incarvillea Delavayi; they are 3 inches in diameter; rose-purple in color, with a rich yellow throat, spotted with purple. The plants are of easy culture. The flowers are almost as large as a gloxinia. 15 cts. each, $1.25 per doz., $8.50 per 100.

Senecio

Clivorum. With enormous round leaves, resembling somewhat the gigantic Petasitis and with pure yellow flowers borne on stems 3 feet high. 25 cts. each, $2.50 per doz.

Sidalcea

Rosy Gem. Beautiful new variety, remarkable for its graceful spikes of rosy pink flowers. 15 cts. each, $1.50 per doz.

Sedum

Spectabile atropurpureum. A handsome plant for the border or rock-garden; foliage of a dark coppery purple shade; showy heads of rosy red flowers. Height, 1 foot. 15 cts. each, $1.25 per doz.

Thalictrum

Adiantifolium. The foliage of this plant so closely resembles the Maidenhair Fern that it is often mistaken for the latter when seen growing in the nursery beds. It makes a very beautiful plant, is quite hardy, and grows about 6 inches high. 10 cts. each, $1 per doz., $7.50 per 100.

Trollius

Asiaticus, f. Croceo. True. This plant is very scarce. The flowers have a very fine, dark orange color, and its form is between T. Japonicus and T. Cucurbitus, Orange Globe. 15 cts. each, $1.50 per doz.

Japonicus, Excelsior. This variety is a great improvement on the well-known Japonicus, from which it differs by its better color. A very free-flowering variety. 15 cts. each, $1.50 per doz.

Veronica

Longifolia subsecalis. Is destined to create as much favor in the flower world as did the Golden Glow. It is the handsomest blue-flowered plant we know of, growing to a height of 2 feet and completely studded with spikes of blue flowers. Its flowers are fine for cutting. It is perfectly hardy and increases in strength and in beauty each succeeding year. It makes the best blue-flowered hardy border plant obtainable. First-size plants, 10 cts. each, $1 per doz.; $6.50 per 100; second-size plants, 10 cts. each, 75 cts. per doz., $5.50 per 100.

Gentianoides folia variegata. An exceedingly ornamental hardy plant. The glossy foliage is striped and margined white and green. Dwarf, compact growth. Spikes of flowers 1 foot long, of a light blue color in spring; very useful for cutting. 15 cts. each, $1.50 per doz.

Helianthus

THE WONDERFUL NEW WINTER VEGETABLE

The greatest addition to the vegetable kingdom for many years. A complete substitution, in taste, for fresh asparagus. Yields half as much again as the potato.

Helianthus is a hybrid of the sunflower family, producing an abundance of bright yellow flowers. Its important economic use, however, is the edible root tubers, which can be grown in any part of the continent, and will thrive in any kind of soil—from the wettest to the driest—but it responds quickly to generous treatment.

Food value.—Dr. Koch, a well-known food specialist, gives the following figures as units of food value:

<table>
<thead>
<tr>
<th>Food</th>
<th>Helianthus</th>
<th>Green Peas</th>
<th>Turnips</th>
<th>Potatoes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calories</td>
<td>200</td>
<td>300</td>
<td>150</td>
<td>75</td>
</tr>
</tbody>
</table>

This interesting comparison needs no comment.

Plant the tubers in the spring in rows about 3 feet apart each way.

Price of tubers, 15 cts. each, $1.50 per doz., postpaid.

SHRUBS

Abelia

Chinensis grandiflora. A choice, small shrub, of graceful habit, producing through the entire summer and fall months white-tinted, lilac, heather-like flowers in such abundance as to completely cover the plant. Plants 1 to 1½ ft., transplanted, 50 cts. each; 2 to 3 ft., transplanted, 75 cts. each; 2 to 3 ft., transplanted, with bail, $1 each.

White Baby Rambler Rose

The White Baby Rambler Rose, Katherine Zeimet, is an interesting variety and we think it will become a general favorite. It is a good grower, with clean, fresh foliage, growing freely. Its flowers are pure white, with the fragrance of the hyacinth, and are perfectly double. It will be welcomed for its color and its floriferousness. Strong, field-grown, 2-year-old plants, 25 cts. each, $2.50 per doz., $20 per 100; ½-in. pots, 10 cts. each, 85 cts. per doz., $10.50 per 100.

Hydrangea

Arborescens grandiflora. This Hydrangea is certainly a grand acquisition for general garden purposes and is sure to be tremendously popular as soon as better known. Its value as a forcing and tub plant is little realized so far. It forces with the greatest ease and can be had at Easter and Decoration Day, or it may be retarded and brought on later for general decorative purposes as a tub plant. Its purest white blooms and deep green foliage present an effective contrast. Then, after the white blooms, after a period of pure white, slowly assume light green tints.

The plants arrived in first-class condition and I was delighted with the remarkably large and fine roots.—S. M. P. Rich, Saratoga Springs, N. Y., May 15, 1909.
Hydrangea, continued

later maturing into deep green, and all these color changes look well. One-year old, field-grown plants, if potted in 5- or 6-inch pots, will make plants producing from four to five great flower-heads, with the treatment usually given the Hortensia type. Field-grown plants, 2 to 3 ft., 30 to 5 stems, 25 cts. each, $1.50 per doz.; 1 to 2 ft., 1 to 3 stems, 25 cts. each, $2.50 per doz. Plants from 3-inch pots, 15 cts. each, $1 per doz., $6 per 100.

Cranberry

The Hardy American (Vaccinium macrocarpon). Although found growing wild in bog and on moss land, will adapt itself and thrive in any ordinary good soil. Under cultivation, it makes a solid carpet in a season or two if planted 6 inches apart, and produces abundant bright scarlet fruit, which persists until late winter or spring. In spring the coloring is a bright green, but as autumn approaches the dense evergreen foliage turns brilliant shades of bronze. It will be found a very good substitute for dwarf box for edging and for rhododendron or shrub border. Along streams and shores of ponds it is extremely desirable, lighting up dark evergreen foliage in a charming way and effectively holding banks from washing. On a large estate near Boston, 20,000 plants were used in this way after previous extensive trials. Strong clumps, 15 cts. each, $1.50 per doz., $10 per 100.

Daphne

Cneorum (Garland Flower). A charming little Alpine plant, a gem for rockwork, garden border or ground cover, with creeping stems, covered with small, dark, evergreen leaves, and heads of fragrant, rose-colored flowers, which make the plants a carpet of pink, during the spring. Strong plants, 25 cts. each, $2.50 per doz., $20 per 100; extra-strong plants, 50 cts. each, $5 per doz.

Dahlia

Jack Rose. Decorative variety. The floral sensation of the season, combining every good quality found or desired in Dahlias. The flowers are large to very large, specimen blooms measuring 6 to 7 inches across and 4 inches deep, with a full, high center; the outer petals reflex to the stem as the flower fully expands. Same color as a Jack Rose. Roots or plants, 25 cts. each, $2.50 per doz., $15 per 100.

New Roses

Blue. Said to be the first blue Rose sent out. 1-year old plants, 75 cts. each.

Flower of Fairfield. An everblooming type of the well-known Crimson Rambler. It blooms continuously from spring until autumn, very profusely. Strong, field plants, $1 each. Plants from 3-inch pots, 50 cts. each.

FRUIT TREES AND SMALL FRUITS

APPLIES and CRABS. In the best varieties; Each Dec. 100

summer, fall and winter sorts.

The Digitalis and the Clematis Davidiana arrived today in excellent shape. I can assure you that I will remember you whenever I need any plants. Hoping to have the pleasure of doing more business with you. — HENRY ANDERSON, M.D., Creese, Neb., May 15, 1909.
General List of Hardy Perennials

INTRODUCTORY REMARKS AND TERMS

The plants offered herein are all sturdy, either nursery-grown or established in pots, and can be depended upon to be true to name and to flower satisfactorily the first season.

Our stock of plants is reasonably large, having 20 acres in cultivation and upward of 500,000 plants to draw from. We make a specialty of supplying landscape gardeners, dealers and others in the trade.

We print real prices, which as long as unsold and without engagement we are willing to accept. The prices are net, except being subject to 5 per cent discount when cash accompanies order; otherwise payable in thirty days from date of invoice on approved credit. Packing charges at cost, f. o. b. Sparkill, N. Y. To meet reputable competition, we will reduce our prices still further on being given the opportunity.

Six of one kind furnished at dozen rates, 25 at 100 rates, 250 at 1,000 rates, unless otherwise specified.

Clumps (or plants of extra-large size) can, in most cases, be supplied at double the prices named, which are for ordinary size plants. These clumps or extra-large plants will be sent only when specially ordered.

Aconitum (Monkshood)

Handsome, herbaceous plants, with bold spikes of hood-shaped flowers, very effective in flower borders, shrubberies and rock-gardens, thriving anywhere, either in sunny or shady aspect; height, 4 to 5 feet; summer and autumn-flowering. Care should be taken that the Aconitums are not planted near in or in the kitchen garden, where their tuberous roots might accidentally be used for food, as they are poisonous. Plant in autumn or early spring.

Japanese Anemones (Anemone Japonica)

These rank among our showiest and most useful of late summer and autumn-flowering Hardy border plants. The white Anemone, A. Japonica alba, has long been a favorite in old-fashioned gardens. For cutting, all are of inestimable value, as they come in at a season when hardly flowers are in demand and getting scarce. They are perfectly hardy and thrive in any ordinary flower border. When massed and naturalized in woodlands and shrubberies, few plants are more beautiful.

Perennial Asters

**Perennial Asters (Starwort, or Michaelmas Daisies)**

Michaelmas Daisies now fill a most important place in all hardy gardens, lighting up the borders and shrubberies with their masses and clouds of dainty and brightly colored blossoms throughout the autumn months up to November, when other flowers are scarce. To cut for vases and church decoration, etc., they are invaluable, providing, as they do, an inexhaustible supply of bloom. The dwarfer and more slender-growing kinds deserve prominent positions in the choice border and rock-garden.

Our collection enumerated below includes many handsome new forms which are advances upon the older varieties, both in quality of flower and habit of growth, and their value for cutting.

For the convenience of purchasers, we have indicated the relative earliness or lateness of the various Michaelmas Daisies offered by adding after the name (1), (2), (3), (4), (5) denotes those varieties commencing to bloom at the end of July and continuing decorative throughout August; (2) varieties opening their blooms in September; (3) those varieties which commence flowering in October.

Price of strong plants from 3-inch pots, that will make a profusion of bloom the first season planted, 10 cts. each, 75 cts. per doz., $5.00 per 100, except where otherwise noted.

---

**Asters, Hardy, or Michaelmas Daisies**

**Amelius, Perry’s Favorite.** New. See Novelties. 15 cts. each, $1.00 per doz.

**Amethystinus.** (3) Produces small, bright lilac flowers, Height, 4 ft.

**Acris.** (1) Bright lilac-purple flowers in great profusion, habit, Height, 2 ft.

**Beauty of Colwall.** New. See Novelties. 25 cts. each, $2.50 per doz.

**Chapmanni.** (2) Light ageratum-blue; very graceful, large sprays. Height, 5 ft.

**Collarete.** (2) Large, rosy blossoms. Height, 2 ft.

**Datschii.** (1) Pure white. Height, 3 ft.

**Ericoides Clio.** (2) True. Charming, long, graceful sprays of small, blush, daisy-like flowers; very distinct. Height, 3 ft.

**Forget-me-not.** (2) This variety grows about 2 feet high, has strong, stiff stems, branched and covered with myriads of small, daisy-like flowers; white, with a brownish eye. A very attractive sort.

**F. W. Raynor.** (2) Light, reddish violet. Height, 4 ft.

**F. W. Burbridge.** (2) Large, soft heliotrope flowers; very fine. Height, 4 ft.

**Gertrude.** (1) Foliage small and fine; habit graceful, mothered with a profusion of small, dainty, clear purple flowers.

**Grandiflorus.** (3) Best and largest; dark violet flowers; late and fine bloomer. Height, 2½ ft. 15 cts. each, $1.50 per doz., $10 per 100.

**Laviss.** (2) Long sprays of large, deep blue flowers; light, graceful habit. Extra fine. Height, 4½ ft.

**Laviss Calliope.** (3) Large, spreading heads of rich lavander flowers. Height, 2½ ft.

**Mad. Saynese.** Pale lilac; very free. Height, 1½ in. (2)

**Melpomene.** (2) Tall (5 ft.), large, purple flowers, in long, graceful sprays.

**Mesa grande speciosa grandiflora.** New. See Novelties. 15 cts. each, $1.50 per doz.

**Novae Angiae (1).** Bright purple-violet. 4 ft.

**Novae Angiae rubra.** (2) Deep reddish violet. Height, 4 ft.

**Novelty.** New. See Novelties. 10 cts. each, $1.00 per doz., $7.50 per 100.

**Paeoniacées.** (1) Small, pure white flowers; erect dwarf habit, Height, 1 ft. This is a continuous bloomer and makes a desirable border plant.

**Polyphyllus.** (1) Elegant foliage; small, white flowers with lemon centers. Very effective. Height, 4 ft.

**Robert Parker.** (2) Large sprays of beautiful, large, soft lavender-blue flowers, with yellow center; extra fine. Height, 1½ ft. A valuable cut-flower plant.

**Snowflake.** (2) Pure white; very free. Height, 1½ ft.

**Shortii.** (1) Long, graceful sprays, mothered with small, bright lilac flowers; valuable for cutting. An exceedingly beautiful plant. Height, 2½ ft.

**Sub-caeruleus.** New. See Novelties. 10 cts. each, 75 cts. per doz., $6.50 per 100.

**T. E. Ware.** (2) Light blue; one of the best of its color. 3½ ft.

**Trineris.** (3) Rich violet-purple; distinct, large foliage. Height, 1½ to 2 ft.

**Top Sawyer.** (2) Large lilac flowers of perfect shape. Height, 1½ ft.

**Versicolor.** (1) Small, white flowers, changing to rose; erect, branching habit. Height, 2½ ft.

**White Queen.** (3) Large, white, free-flowering variety. Height, 3½ to 4½ ft.

**Wm. Bowman.** (2) Large, purple flowers on stems 3½ feet high. A late, continuous bloomer; one of the latest to bloom and blooms equal in size to any other.

**Aster, Dwarf Alpine Varieties**

**Julia-flowers, charming for rock-work.** Height, 6 to 9 in.

**Alpinus (Blue Mountain Daisy). Flowers Each**

Hardy Pompon Chrysanthemums

These Hardy Chrysanthemums now take an important place among border plants for general outdoor decoration from summer to autumn. Their bright and attractive flowers, which are produced in great abundance, are much valued for cutting during the late summer months and considerably lighten up the hardy border at that season of the year. They make, also, charming pot-plants for indoor decoration.

Our collection, enumerated below, is a careful selection of what we consider the best of the standard sorts and newer introductions.

NEW EARLY BLOOMING HARDY DOUBLE POMPONS

Ready to cut by mid-October. Strong plants of these new varieties in 3-inch pots, 10 cts. each, 75 cts. per doz., $5.00 per 100.

Alma. A beautiful pink variety, like a miniature Mrs. Perrin; flowers large for a Pompon and plant 3 feet high. A beauty.

Baby. Grows only a foot high, with hundreds of little golden yellow, double flowers, 1 inch in diameter; quilled petals; it has delightful fragrance.

Belle of Weybridge. Bronzy red; very fine, early variety.

Evelyn. The most beautiful of pompons, pure in color, of full, fluffy form; very early; extremely useful to every grower of cut-flowers.

Geo. Meadows. This is a Pompon variety that blooms constantly from early summer until frost, and might be termed a summer-flowering Chrysanthemum; flowers very profusely; double cream-white.

Ida. Bright red of beautiful shade, fine size and elegant form; one of the earliest.

Waco. Creamy white, shading to yellow; incurving petals; rather large blooms.

DOUBLE HARDY POMPONS (Older Varieties)

Strong plants from 3-inch pots, 8c. each, 60c. per doz., $3.50 per 100.

Varieties marked “But” have small, round, button-shaped flowers. Those marked “Lg.” have larger or aster-like flowers.

Anna Maria. Creamy white, tipped pink. But.

Denizula. Long sprays violet-pink. Lg.

Globe d’Or. Dwarf, bushy; clear yellow. Lg.

Kadar. Bronze-crimson, yellow center. Lg.

Lyndhurst. Bright, crimson-maroon. Lg.

Prince of Wales. Pure white. Lg.

St. Illoria. Silvery pink. Lg.

Rhoda. Pink, shaded white. But.

NEW SINGLE HARDY POMPONS

For growing in bush form or sprays. From a celebrated English specialist’s collection.

Strong plants from 3-inch pots, 10c. each, 75c. per doz., $6.50 per 100.

Lady Smith. E. G. Hill & Co. say this is one of the prettiest they have seen. Flowers about October 15, completely covered with bright pink flowers which are extremely lasting.

Lion Bowers. Yellow; enormously free.

Mersham White. Large, pure white; disbud slightly.

M. J. Osborne. Large, pink, white eye.

OLDER HARDY SINGLE POMPONS

Strong plants from 3-inch pots, 8c. each, 60c. per doz., $3.50 per 100.

Rosy Morn. Silvery pink.

Clara. Pearl-white. But.

Wallis. Pure yellow.

Princess of Thule. Orange-red.

HARDY LARGE-FLOWERING DOUBLE JAPANESE

The stock from which these varieties are grown was taken from an old-fashioned garden where they had stood the severest winters. They are the best we have yet seen of this type—being large and perfect flowers. We can offer four colors. Plants in 3-inch pots. Each 25c. Doz. 1.00.

Large White.

Large Light Pink.

Large Yellow.

Large Crimson.

### PLUMARIUS VARIETIES, HARDY GARDEN CARNATIONS OR PINKS

These come into flower before the more tender carnations, and remain decorative a long time; being very sweet-scented and abundant bloomers, they are greatly valued for cut-flowers. No garden should be without these pinks, which are perfectly hardy and of very easy culture. As border edgings to flower borders they are admirably adapted, their grayish foliage harmonizing well with other colors. Plant in early autumn or spring.

**Hardy Garden Pinks, or Dianthus Plumarius**

---

**Note:** The document contains a list of flowers and their prices, along with descriptions of various cultivars and types. The text is arranged in a tabular format, with columns for the name of the flower, description, and price. The document is a wholesale price-list for nurseries, specifying quantities and prices for different varieties of flowers. The text also includes notes on the use of the flowers in gardens and their characteristics. The document is a valuable resource for gardeners and nursery owners looking for information on different plant varieties and their pricing.

Iris (Fleur-de-Lis)

The Iris is the "orchid" of the flower garden; its blossoms are the most rich and varied in color of hardy plants. It should be extensively planted in flower and shrubbery borders and wild gardens. When established, the plants yield a great quantity of bloom.

There are few hardy plants more useful and so decorative, either for beds, groups, or as cut-flowers. This is particularly so with the Japan section, it being quite common to find flowers measuring over 6 inches across, and their being perfectly hardy, increase in beauty from year to year, with very little attention.

German Iris, or Flag (Iris germanica). Early flowering:

Iris of German origin.

Prices received in fine condition. I want to thank you for your promptness and fidelity in payment. — Mrs. H. M. Chambers, Georgetown, Ky., May 25, 1909.
Japanese Iris (Iris Kaempferi)

Or the Clematis-like Iris of Japan

The magnificence of these splendid new Japanese Irises surpass any written description that we could give of them. The large, flat flowers measure 6 to 8 inches in diameter, with a breadth of petal 3 to 4 inches; the prevailing colors are white, red-purple, crimson, rose, lilac, lavender, French gray, purple, violet and blue, each flower usually representing several shades. Season of blooming is from June to August.

Japanese Iris (Iris Kaempferi)—

Gekka-no-nami. Dense pure white, yellow blotches.
Shishi-odori. Purple stained.
Kumoma-no-sora. White, sky-blue zone.
Kumo-no-obi. Dark lavender-purple; white halo.
Kagaribi. Brilliant ruby, feathered white; yellow blotches.
Ragejukuuro. Blue and purple, heavy feathered white; yellow blotches.
Yedo-kagami. Crimson, claret, orange blotches, with blue halo.
Iso-no-nami. Carulean-blue on gray-lilac, flaked, speckled; large yellow blotches.
Datedogu. Rich claret-red, orange blotches, blue halo.

Prices of clumps of the above named varieties, 12 cts. each, $1 per doz., $7.50 per 100. Mixed all colors, 10 cts. each, 75 cts. per doz., $5.50 per 100.

PAECHTHYSANDRA terminalis... $15.00

Peony Festiva maxima

MIXED P. EONIA SINENSIS

Mixed Red Varieties $12.00 $10.00 $7.50
Pink Mixtures $12.00 $10.00 $7.50

All Colors Mixed. We have a specialty line of plants in various colors, including red, purple, blue, and white, which are perfect for adding color to any garden. They are available in different sizes ranging from 1 to 5 feet in height, and are suitable for both full sun and partial shade. For more information, please contact our nursery.

SINGLE PEONIES

These single Chinese Peonies are sold by the dozen, and they offer a unique combination of color and texture. They are available in a variety of sizes, from small to large, and are perfect for adding interest to any garden. For more information, please contact our nursery.

P. EONIA ORCHIDEUM

Beautiful Hardy Double European Peonies, Early-flowering

These Peonies are very old inhabitants of our garden, and at the present day, like many other old-fashioned flowers, are being generally appreciated, and well they may. In partially shaded groves, these European Peonies thrive and are happy, while in beds or as single specimens they are exceedingly effective. For more information, please contact our nursery.

P. EONIA FENDUCLASSA

A remarkably distinct and beautiful plant, with large crimson flowers, nestling amongst a grayish foliage, it is dwarf and compact in habit, and altogether a most valuable border plant. For more information, please contact our nursery.

P. EONIA MADAUMA

Double flowers $12.00

JAPANESE TREE PEONIES

Extra-Strong plants, 10 distinct, double varieties, 75 cts. each, $5.00 per doz.
**Papaver orientale** (Giant Oriental Poppies)

For gorgeous coloring, these Giant Oriental Poppies have few rivals amongst hardy plants. To cut for vases, the flowers, which are abundantly produced, are greatly valued, and will last as long as other flowers, if cut in the early morning, when the bud is but just breaking out of the green calyx be stripped off; they will then open in water and the petals will not readily drop. The varieties enumerated are all first-class. Pot-grown Poppies can be planted successfully without the least set-back in early spring.

**Mixed Colors, Seeds**

**Phlox** (Perennial)

The beauty and usefulness of these grand border plants give them a deserved first place amongst hardy plants for cutting; their large trusses go a long way in flower decorations. In color they range from the true crimson to the pure white, from soft rose and salmon to bright coral-red, all having a delicate fragrance. They succeed in almost any soil enriched with manures. From 10 to 15 spikes of bloom of the Sulfurificosa, or Extra-flowering Phlox, are removed as soon as open, and the plants given a good soaking of water, they will produce a second supply of flowers, thus continuing the display until late in Autumn. These later blooms are often much finer than the first.

A great advance has been made in the last few years in this beautiful and useful family of hardy plants, the result being larger and broader trusses, with individual flowers twice and thrice the size of those of the older kinds. New and striking colors of great beauty have also been added. The varieties offered below include the finest of new introductions and only the very best of the older kinds.

For those who are not acquainted with the many varieties herein offered and whom the brief descriptions may not assist in selection, we have marked with an asterisk (*) such varieties as we consider the best for all purposes.

**PHLOX DECUSATA IN MIXTURE**

In going over our Phlox during the growing season, we find many sorts sporting, which are always carefully removed and mixed together in mixtures, these flowers are sometimes lost by accident. This mixture contains some of the best types of all colors, making them suitable for massing where no particular color effect is desired. Strong, field-grown roots, in mixture, 5 cts. each, 50 cts. per doz., $3 per 1000.

**PHLOX SUFFRUTICOSA** (Early-flowering Phlox)

These flower two or three weeks before Decusata, and make fine spikes of bloom again in the fall. Specially useful for cutting.

Primula Cortusoides Sieboldi (Hardy Japanese Primrose). See Novelties. The flowers of this variety equal the Chinese Primrose (Primula Sinensis) in color and size, and can be forced into bloom very quickly in a low temperature of 50 degrees. It is a grand plant for all purposes, and is certain to become a universal favorite when better known. Perfectly hardy. They embrace all shades, from bright red to pale rose and white. Colors separate or in mixed. 14¢ each. $1.50 per doz., $8 per 100, in 12 named sorts. Collection of one each of 12 varieties for $2.

PRUNELLA Webbiana. $0.10 $0.25 $0.50
PULMONARIA saccharata maculata. 12 1 00 8 50

Pyrethrum
The Pyrethrum in May and June occupies the same position as that held by the chrysanthemum in September and October; therefore the name “Spring-flowering Chrysanthemum” is more appropriately given to it. The flowers are large, elegantly formed, and vary in color from snow-white to the richest crimson. The leaves of the plant are graceful, the foliage elegant, and the flowers are produced in great profusion. It is very hardy, surviving without the slightest protection during the severest winters. In herbaceous borders, shrubbery and situations where a mass of color is important in May and June, Pyrethrum are matchless. As cut-flowers for vases and table-decoration, the blossoms are of the greatest value, and last in water longer than almost any other flowers.
The single varieties are thought more charming than the double, their simplicity, brilliancy of color and, as a rule, freer blooming, rendering them better adapted for cutting or decoration.

DOUBLE VARIETIES
Our collection of these desirable hardy plants came from a celebrated English specialist, and embraces the best varieties suitable for cut-flowers, etc. We have a fine lot in 3-inch pots in the following named varieties.
25 cts. each, $2 per doz., $15 per 100
Anacreon. Bright rose; white tips.
Deese. Flesh-color.
Kriemhilde. Pale rose.
Marceau. Rose carmine, tipped yellow.
Mont Blanc. White.
Sir James Miller. Similar to Anacreon; larger flower.
Triomphe de France. Bright crimson, shaded purple.
Lady Kirkdale. Delicate buff-yellow, tinged with flesh; exceedingly pretty.

SINGLE VARIETIES
The brilliant and fresh colors of the Single Pyrethrum render it a desirable plant for cut-flower for market.

Veris superba. Giant yellow Polyanthus. True Hardy Primrose. 12 1 00 7 50
Vaguris. English yellow Primrose. 12 1 00 7 50

English Primrose, Primula vulgaris
Sedum (Stonecrop)

Charming plants, with great diversity of character, most of them having dwarf and spreading growth, while a few are stately border plants. For carpeting, also for covering rockwork, walls and ruins, few plants are as useful, as they will grow in any place when fully exposed to the sun. Some have purple, brown or mealy white foliage; others have a profusion of yellow, white or pink flowers; the dwarf varieties are extensively used for edgings and carpet beds.

Viola cornuta (Tufted Pansies)

Most valuable of spring and summer bedding plants. These bedding Violas are among the most valuable spring and summer plants, and are unrivalled where a continual mass of bloom of bright and attractive colors are required from spring till autumn.

"I suspect that Tufted Pansies or Violas will become the most popular plants for covering the ground because they bloom all spring and summer (except for an enforced rest of about ten days) and they have a great range of colors," says an author. "All our plants of these are established in pots.

SPIRÆA Anthony Waterer. 15 1 50 10
B shredd. 3 to 4 ft. 25 2 00 15
2 to 3 ft. 15 1 50 10
To the Recipient:

To buy our personal requirements, no matter in what line of trade at wholesale, trade or factory rates, is to most of us unusual.

This is our exceptional offer to you and is exactly what we mean in sending you our wholesale price list of Hardy Plants in which this is enclosed.

A short perusal of our prices in comparison with those of more elaborate or retail catalogues should be convincing proof of the great advantage you are receiving.

Beside the great saving we intend it to remove the bugbear that often frightens one when improvements in the permanent garden are suggested.

TO DEMONSTRATE: Sufficient plants for a permanent Hardy border 100 ft. long X 3 ft. wide need not cost more than $15.00 for 250 plants (close planting) and we would assist you without extra cost in the selection and furnish a plan and planting list easily understood. A larger or lesser quantity at about the same proportion of cost.

The quality of stock we send out and the service we give goes without saying "is the best" which is attested by the many complimentary letters received from responsible customers.

We solicit enquiries and will gladly give information and advice where any special effects are desired.

Awaiting your valued orders,

Yours very truly,

P. S.: We would esteem it a favor if you will send us the names and addresses of a few of your neighbors who are likely to be interested in our catalogue and goods.
HOUSE & GARDEN shows in picture and text all that is best in house building, furnishing and interior decoration. In strong, readable articles, by men who know their subjects and who are authorities on what they write, the various architectural styles are pictured and described—Colonial, English Half-timber, Cement, Stucco, Tudor, Mission, Bungalow, etc. All the ramifications of the subject are taken up in articles which will delight and help every home-maker—the various rooms of the house, hallways, stairways, chimneys, fireplaces, porches, windows, entrances, outdoor sleeping and living rooms, wall coverings, rugs, curtains, pictures, draperies, antique furniture and furnishings, and the innumerable things about the house in which every home owner is interested. The articles are superbly illustrated by the finest half-tone engravings.

The surroundings of the house are as important as the interior for comfort and beauty, and HOUSE & GARDEN deals adequately with this delightful side of country living. Its treatment of the subject is essentially practical, is of interest alike to the beginner or advanced gardener and for the small plot as well as for the large estate. It covers every phase of the subject from window-boxes to landscaping: The vegetable garden, the flower garden, the fruit garden, bulbs, shrubs, trees, hardy flowers, hedges, vines and trailers, the lawn, the water garden, the rock garden, hotbeds, coldframes, the greenhouse, fertilizers, insecticides and the thousand and one things that demand the interest and attention of every garden-maker. There is even a Beginner's Department which deals with first principles from which the most inexperienced can work.
SIX BEAUTIFUL MAGAZINES FOR $1.00

HOUSE & GARDEN, enlarged and greatly improved, is the authoritative guide in all matters relating to the house and to the garden. We are glad to direct the attention of our patrons to this aid to intelligent garden making, since far better results in growing bulbs, plants and seeds will be secured if their planting and culture be carefully directed.

The issues for the next six months will be full of notable articles on the home, its building and furnishing, and its surroundings. The April number will be a splendid Spring Gardening Annual especially devoted to the garden and its work,—this issue alone will be of invaluable service to those interested in the beauty and utility of the garden. The subscription price of HOUSE & GARDEN is $3. a year, but the publishers have made a Special Rate to our patrons so they may get the magazine for six months for $1., which includes all the important gardening issues of the Spring and early Summer.
